

Female coupling with TW/PTFE lining Hydrochloric acid resistant

Technical specifications:

It's a DIN TW standard coupling with Teflon coating, which is persistent against the kind of chemicals and acids, which can attack stainless steel (for example Hydrochloric acid, ferric chloride).

We are able to give PTFE, ETCFE, FEP or PFA coating for almost any unique hose tail, adapter or coupling.

The PTFE coating can be virgin (white, translucent) or electrically conductive (black).

Size	Type	Title	Lining	Article number
DN 50	TW MK50 PTFE	female coupling crown + lever	PTFE natural	101971
DN 50	TW MK50 PTFE AS	female coupling crown + lever	PTFE black antistatic	103988
DN 80	TW MK80 PTFE	female coupling crown + lever	PTFE natural	101972
DN 80	TW MK80 PTFE AS	female coupling crown + lever	PTFE antistatic black	103035
