

## Washing gun With fan-shaped direct foaming nozzle

### Technical specifications:

It can be integrated in two ways. On the picture the gun has a male thread with a female rubber coated quick connector and fan shaped nozzle head with male quick coupling. The head can be easily disconnected from the quick coupling to change it to a different lance or head. (The exchangeability is practical, if you want to use the same gun to apply foam then wash it down with water.)

The cheaper version is when the foam spray nozzle directly, without the interventions of the quick coupling, connecting to the female thread of the gun. We recommend this, if the nozzle head doesn't have to be changed.

The product is a permanent storage lots. Meantime, we hold the right of selling the stock in products.

| Product name   | Article number |
|--|----------------|
| stainless steel cleaning gun with 1/2" male thread (see it on the picture) | 300007         |
| brass cleaning gun with 1/2" male thread                                   | 300256         |
| fan-shaped foam lance with male quick coupling (see it on the picture)     | 350153         |
| cleaning gun with embedded foam lance (see it on the picture)              | 350159         |
